

Plant Netting

Plant netting, widely used as agricultural netting, greenhouse netting and garden netting, applies on plant support netting, shade netting, windbreak netting, anti-bird netting and anti-insect net.

Plant support netting is applied to support the vine plants growing and climbing on the net, material in 100% PP with UV protection, colors in green, white, or transparent. The size of opening mesh 15*17cm, and the rolling size could be 1m*1000m, 1.7m*1000m, 2m*1000m.

Shade netting is also the windbreak netting or anti hail net, which applies to agricultural cultivation for vegetables, fungus plants, flowers, aquaculture, etc, with advantages of shading and heat preservation, also moisture preservation, and with the quality of strong stretching resistance, radiation resistance and corrosion resistance. This shade net provides shade against sunlight and to control temperature, in meanwhile, this also named windbreak netting or anti hail net can also protect plants against frost, wind and hail damage, and also can be used for temporary fencing, packaging applications, greenhouse covering. Material in HDPE with UV protection, colors can be in black, green, white, etc. for shade rate 30%~95%, and long using.

The aluminum foil shade screen or shade thermal screen used in high level greenhouse indoor, this shade screen can shade and cool the greenhouse, saving energy, anti-drip and frost, with advantages of shading, energy saving, ventilation or keeping moisture. The sizes can be customized.

Anti-bird netting as the bird control product is perfect for draping over fruit trees or covering rows of grape vines, can also be propped up to form a bird barrier over vegetables, material in high density polyethylene (HDPE) with UV protection. The using life is more than 3years.

Anti-insect net applies to vegetable cultivation, it prevents pests and diseases with very small opening mesh eyes, strong product strength, radiation resistance, corrosion resistance, as well as non-toxic and tasteless. The material in HDPE and UV protection, color in transparent with good transparency, various opening sizes for

choice: 0.07*0.27mm, 0.22mm*0.31mm, 0.27mm*0.77mm, 0.49mm*0.77mm, 0.95mm*1.05mm, 1.35mm*1.35mm, 2mm*7mm.

Olive net is used to hold the olives, hanging between the trees with the strengthen corner holes, or put on the ground around the olive tree. Its material is HDPE and UV protection, any color is available, and various sizes for choice.

1. Plant Supporting Netting

Applies:

Plant supporting netting is applied to support the vine plants growing and climbing on the net.

Material: PP and UV

Quality:

- * Tensile Strength 50N/m²
- * UV content: 0.3‰~0.5‰
- * Temperature range: -20°C~+50°C

Colors: Green, White, and other colors

Packing: in rolls

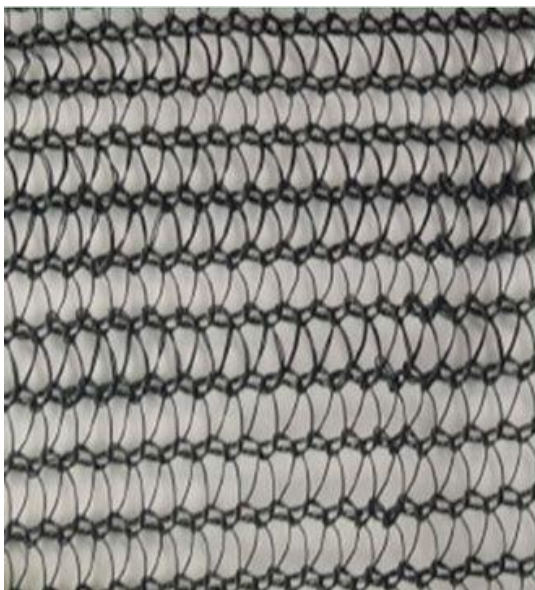

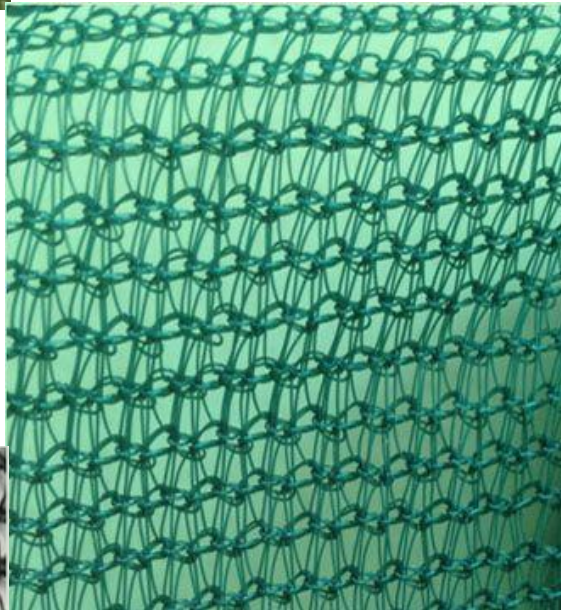

Size: Opening size of mesh: 150x170mm, 100x100mm

Our advantage:

- * We have various plant netting for the different use on agriculture: plant supporting netting, windbreak netting, shade screen net, anti-bird netting, anti-insect netting, olive net, etc.
- * We can research the new models for your special request;
- * Strictly quality control, we check the product quality and be sure the batch production quality same as the approved.
- * Check the production loading properly.
- * Tracking the producing time, taking care of delivery as schedule.
- * We supply wide range of products for greenhouse supplies on horticulture and agriculture.

2. Windbreak Netting and Shade Net

TEL: +86 21 5033 6151

**Contact us: info@jychinasourcing.com
<http://www.jlgreenhousesupplies.com/>**

Applies:

Windbreak Netting is used to protect flowers, trees and other plants against frost, wind, and hail damage. And it is also used as Shade Net, to provide shade against sunlight and to control temperature. So, this netting is used for greenhouse covering, packaging applications, temporary fencing.

Material: new HDPE and UV

Quality:

- * Windbreak rate 30%~70% available
- * Shading rate 30%~95%
- * Heat preservation
- * Moisture preservation
- * Strong stretching resistance
- * Radiation resistance
- * Corrosion resistance
- * Weight 45g~350g per sqm available
- * Useful life 3~10years

Colors: Green, Black, White, and any other colors

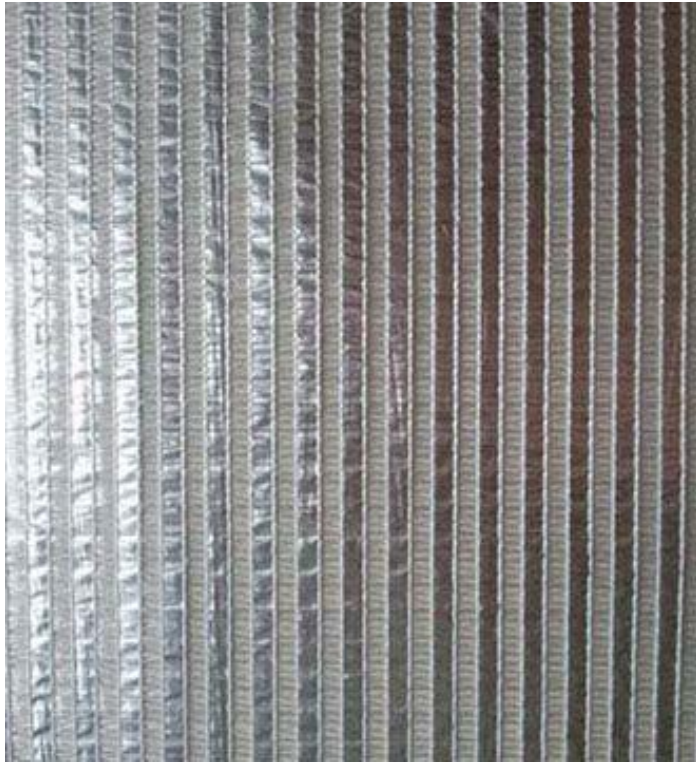

Packing: 100 meters per roll, width in 100cm~600cm

Size:

Windbreak 30% - 65g/sqm; Windbreak 40% - 105g/sqm; Windbreak 50% - 120g/sqm
; Windbreak 60% - 130g/sqm; Windbreak 70% - 190g/sqm;

3. Aluminum Foil Shade Thermal Screen (indoor use)

Applies:

This Aluminum foil Shade Thermal Screen can be used in high-level greenhouse, the shade screen is draped over the greenhouse by gear system or wire system

Material: Aluminum foil, PET film, FDY Polyester String

Quality:

- * Shading and cooling the greenhouse
- * saving energy
- * keeping moisture
- * Shrinkage: less than 0.5%
- * Service life: 5 years in correct using

Colors: aluminum foil finishing

Packing: in rolls

Size: Standard width: 3.2m, 3.5m, 4.3m, 4.8m, 5.3m

Length can be customized

Special dimension is available by sewing and cutting

4. Anti-insect Net

Applies: This anti-insect net is applied to vegetable cultivation

Material: 100% new HDPE and UV 3%

Colors: transparent

Packing: 200meters per roll

Size:

1. Anti-pollen screen, open size of mesh 0.07*0.27mm, wire diameter 0.17mm, luminousness 50%;
2. Anti-thrips screen, open size of mesh 0.22*0.31mm, wire diameter 0.20mm, luminousness 77%;
3. Anti-whitefly screen, open size of mesh 0.27*0.77mm, wire diameter 0.22mm, luminousness 82%;
4. Anti-aphid screen, open size of mesh 0.49*0.77mm, wire diameter 0.22mm, luminousness 84%;
5. Anti-miner screen, open size of mesh 0.95*1.05mm, wire diameter 0.28mm, luminousness 88%;
6. Anti-cabbage fly screen, open size of mesh 1.35*1.35mm, wire diameter 0.24mm, luminousness 91%;

5. Olive Net

Applies:

Olive net is used to hold the olives, hanging between the trees with the strengthen corner holes, or put on the ground around the olive trees.

Material: new HDPE and UV

Quality:

- * strong strength
- * strengthen corners for hanging
- * non-toxic and tasteless * useful life 3~5years

Colors: any color is available

Packing: in rolls

Size: width 1m~8m, weight 30g~150g per SQM,

TEL: +86 21 5033 6151

6. Anti-bird netting

Applies:

This bird control netting is used to be draped over fruit trees or covered rows of vines, and can also be propped up to form a bird barrier over vegetables.

Material: new HDPE and UV

Quality:

Anti-bird netting made from high-density polyethylene monofilament yarns are knitted into an open mesh fabric. This netting can offer a light weight, durable fabric so that it resists tears and abrasions.

Colors:

Green, Black, White, and any other colors

Size:

Weight 8g~120g per SQM available
