These sprouting trays are used for growing of sprouted bean, rice seedling and other plant seedlings, the trays with holes for draining extra water. They are mainly used in the greenhouse.

Our advantage:

- * Different sizes of trays for choice.
- * With good quality material, trays are durable and reusable.
- * Strictly quantity control, be sure the batch production quality is good as well as the approved samples.
- * Check the production loading properly.
- * Tracking the producing time, taking care of delivery as schedule.
- * Wide range of products are supplied for greenhouse supplies on horticulture and agriculture.
